## FACING THE FACTS

With Philip Pearl

This week we are turning over the column to an employer. His message is more significant than any we could undertake to write. His name is William Green, Jr., and he is President and general manager of the Atlanta Stone Works, Atlanta, Ga.

A few days ago this company and Local 273 of the International Brotherhood of Stone Workers celebrated their 50th anniversary in Atlanta. Mr. Green, for the occasion, wrote a brief history of the relations between the company and the union. It was first published in the Atlanta Journal of Labor.

With this brief introduction, we give you Mr. Green's message:

"Eighty years prior to the Spanish-American War, and over a generation before the government found it necessary to pass legislation to protect the working man by guaranteeing his right to organize, a new little stone foundry and an iron gate together in Atlanta to make stones. They had plenty of problems confronting them. They were surrounded by open shops, cheap labor, high freight rates, prejudice against southern-made goods, and hundreds of other things that made their future appear anything but bright.

"This little stone shop was the Atlanta Stone Works and the union was Local 273 of the International Iron Molders' Union of North America. They worked together through two wars, six major depressions and successfully weathered the trials and tribulations incident to a small growing concern. They are now both celebrating their golden anniversary and have a great deal to show for the half-century of working together in peace and harmony based on a mutual understanding of each other's problems.

### A Half Century of Growth

"From a handful of molders, making one sort of cheap black stones, they have grown to a concern making hundreds of different kinds of stones, with an annual payroll approximating one quarter of a million dollars. The company now employs 100 men, and the union has grown to a large manufacturing plant in the whole country. Both the company and the union are to be congratulated by all friends of union labor.

"There is something rare in the relationship of such an employer and such employees. Some of the molders have been with the company for 25 years. They are still with the firm, and in a great many instances, the son has replaced the father and carried on. All of this without strife quite an example to other firms and other unions. It was not by accident that the company and these employees to drop to eight hours a day. No legislation was needed to force a living wage. Time and a half for overtime was a natural thing that did not require any law. The company and the union were taken for granted. No misunderstandings occurred, because the employer and the employee were working toward the same thing and talked things over in the American way.

"Would that all employers and men like these two!"

## John Posselt Dies in Washington; Was President of Engineers Union

Washington, D. C.—John Posselt, general president of the International Union of Operating Engineers and a labor leader for more than 25 years, died in a Washington hospital last night after a long illness.

Mr. Posselt was 54, became ill last year. He had been elected to the I. U. O. E. Executive Board last year at the Washington convention. He was taken to the hospital the following day.

John F. Coyne, president of the Building and Construction Trades Department of the American Federation of Labor and personal friend of Mr. Posselt for many years, said that Mr. Posselt will be "profoundly felt throughout the labor movement."

Other tributes came from President George Meany and many other labor leaders. Mr. Posselt was elected general president of the I. U. O. E. in June, 1931, upon the death of President Arthur M. Haddad, and was re-elected at the Washington convention here last April. He formerly had served as executive secretary.

Mr. Green appointed Mr. Posselt a delegate to the meeting of the Gov-

erning Board of the International Labor Conference at Geneva in October, 1935. He was elected general president of the I. U. O. E. in August, 1935, to August, 1936.

Mr. Posselt was a native of Pennsylvania. He was educated in the public schools. He began work in the shipping industry there. He became president of the Central Labor Union of New York in 1915.

During the World War he was appointed commissioner of commerce for the Government for the Navy and the War Department, and later was chosen to the position of general president of the I. U. O. E. in 1931.

Mr. Posselt came to Washington with his wife, Mrs. Emily Posselt, in 1931. He was elected general president of the I. U. O. E. in June, 1931, upon the death of President Arthur M. Haddad, and was re-elected at the Washington convention here last April. He formerly had served as executive secretary.

## PM Exposes Sufferings of Strikers in Leviton Mfg. Co. of Brooklyn

Brooklyn, N. Y.—Seldom does the story of a strike get into print in the steady and unbroken accumulation of grievances that finally leads to a strike without means and without resources to bear the burden and suffer longer on a picket line.

But the story of the strikers at the Leviton Manufacturing Company in Brooklyn did get into print through the enterprise of the Leviton Manufacturing Company and what a shocking story it is!

The newspaper said the labor editor talked to the strikers and the employees, got both sides of the story, and prepared a fair story. The strikers were told to be patient and wait. The employees were told to be patient and wait. The strikers were told to be patient and wait. The employees were told to be patient and wait.

The reporter found women workers with lacerated and amputated fingers, women guards on the picket line, women who had been in the hospital for weeks, and women who had been in the hospital for weeks.

He found that men and girls were getting miserably low wages under the new system of piece work.

He found a system of fear under the new system of piece work.

## ANTI-LABOR 'MONSIEUR' RIDICULED BY FLEMING

New York, N. Y.—Federal Wage-Hour Administrator William Fleming today told the convention of Government Labor Officials that it is "just nonsense" to believe that the Government is trying to force down labor standards without national defense.

"The argument that a serious labor shortage is one of the chief reasons for the Government's interest in labor law is, likewise, no more than a piece of nonsense," Fleming said.

## Green Urges Labor To Aid Draft Act

New York, N. Y.—President William Green urged all members of the American Federation of Labor to help the Government carry out the provisions of the Compulsory Military Service Act in the interests of national defense.

In a statement issued here, Mr. Green said:

"The bill is not as we would have had to have seen it, but Congress has decided that it is to be the law of the land and the American Federation of Labor will, of course, cooperate in carrying out the law.

"These are times that call for giving, and we will give.

"The new draft act became law when the President signed it on Sept. 16. At the same time he issued a proclamation setting Oct. 16 as the date when all men from 21 to 35 years of age, inclusive, must register. Registration for the draft will be announced in a few days.

"As about 15,000,000 men will be registered, it is not expected that there will be any shortage of men for the military service.

"The law provides a form of job security. Employers are called upon to give jobs back to men who are drafted by the Government. The law also empowers the Federal Government to establish industries which refuse to cooperate in the national defense.

## Machinists Report Great Progress As Convention Opens In Cleveland

Cleveland, O.—Cheered by a report from their officers of record, the 200 delegates to the 1942 convention of the International Association of Machinists, which opened here today, reported that since the last convention in Milwaukee 100,000 members, chartered 400 new lodges and now has more than 500,000 members.

"Every great industry on our continent," says the report, "machinists are the foundry of modern machinery, great or small. This is the beginning of an age of intricate machinery and mechanized power.

"The report also reported great expansion in the aviation field. It now has 100,000 members, and is well known as Boeing, Beech, Consolidated, Lockheed, Lockheed Vega and Canadian Car and Foundry, as well as many airplane parts manufacturers.

In the automobile, railroad, printing, and electric power fields further progress was reported.

Together, since 1933, the membership has more than tripled its membership and has increased its dues-paying members on its rolls.

Great progress was reported in the field of contract work. The report said that the union has secured many new contracts for its members, and that the union is well known as Boeing, Beech, Consolidated, Lockheed, Lockheed Vega and Canadian Car and Foundry, as well as many airplane parts manufacturers.

## House Approves AFL Housing Bill; Unions to Work Two Shifts on USHA

Washington, D. C.—The House today passed a \$100,000,000 emergency housing program, and the American Federation of Labor.

Under the bill the Federal Works Administrator could provide housing units in any area where the President has declared a national emergency of housing exists or is impending which would impede national defense activities.

The dwellings would be available for housing workers in essential defense industries and civilian employees of the Government who are required to duty at military or naval posts and bases.

At the same time it was announced that the WPA would spend more than \$50,000,000 of the War Relocation Authority funds to build double shifts of mechanics at straight time wages on defense housing projects financed by the United States Housing Corporation.

The arrangement made by the United States Housing Corporation for building time in half without substantial increase in cost. The bill would give the Federal Works Administrator authority to make an order in Montgomery, Ala., Columbia, Ga., and other cities where the Government has declared a national emergency of housing exists or is impending which would impede national defense activities.

The bill would also give the Federal Works Administrator authority to make an order in Montgomery, Ala., Columbia, Ga., and other cities where the Government has declared a national emergency of housing exists or is impending which would impede national defense activities.

## Green Addresses Two Conventions

Phedon Support to Defense Drive At President's Convence.

Phedon's Home, Tenn.—Workers throughout the country are giving support to the President's defense drive. President William Green of the American Federation of Labor addressed the convention of the International Printing Pressmen and Assistants' Union of North America here today.

"I have never found a working man or woman in all my travels who has not been as responsive to the defense preparations program," Mr. Green said. "I have never found a working man or woman who has not been as responsive to the defense preparations program."

Mr. Green renewed his plea for labor peace and told the convention that the "peace" attitude of the leader of the CIO prevents the resumption of peace negotiations.

He expressed the readiness of the organized labor to cooperate with the Government in the defense drive and urged the delegates to Great Britain to do the same.

A colorful parade in Harlem preceded the meeting, with the marchers carrying flags and banners and youth organizations marched with a half dozen bands.

## DOES VANISHING ARMY

Atlantic City, N. J.—What has happened to the vanished CIO army drive in New Jersey? Louis F. Meixner, president of the New Jersey State Federation of Labor, says the CIO's "army" has been lost. He said the CIO's "army" has been lost. He said the CIO's "army" has been lost. He said the CIO's "army" has been lost.

### BIRDS OF A FEATHER STILL FLOCK TOGETHER

Toronto, Can.—After fighting international trade unions of the American Federation of Labor for years, the so-called "All Canadian Congress of Labor" permitted itself to be absorbed by John L. Lewis' CIO.

The organization, which was originally hampered Canadian workers in their fight for economic justice in Canada is the Canadian Trades and Labor Congress, with which many AFL locals are affiliated.
